DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on September 29, 2008 has been entered.

Allowable Subject Matter

2. Claims 33-34, 36, and 41-42 are allowed.
3. The following is an examiner's statement of reasons for allowance: This invention deals with a wiring assembly comprising an electrical power supply backbone wherein the backbone comprises at least one substantially continuous length of cable of three electrically insulated sets of electrically conducting cores, wherein three separately insulated sets of electrically conducting cores includes at least three active, neutral or earth wires, a plurality of branched electrical outlets, where each branched outlet is electrically connected to a separate arrangement of active, neutral and earth wiring from the respective electrically conducting cores, such that an electrical socket connected to a first branched outlet, forms part of an electrically separated circuit back to the main supply to that of another electrical socket connected to a second branched outlet having

Art Unit: 2831

a different active, neutral and earth wiring arrangement (claim 33). The above stated claim limitations, in combination with other claim limitations, is not taught or suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

4. Applicant's arguments filed September 29, 2008 have been fully considered and they are persuasive. Specifically, the applicant's argument that "None of the cited prior art teaches or suggests a wiring assembly comprising an electrical power supply backbone wherein the backbone comprises at least one substantially continuous length of cable of three electrically insulated sets of electrically conducting cores, wherein three separately insulated sets of electrically conducting cores includes at least three active, neutral or earth wires, a plurality of branched electrical outlets, where each branched outlet is electrically connected to a separate arrangement of active, neutral and earth wiring from the respective electrically conducting cores, such that an electrical socket connected to a first branched outlet, forms part of an electrically separated circuit back to the main supply to that of another electrical socket connected to a second branched outlet having a different active, neutral and earth wiring arrangement" is persuasive and therefore the claims have been allowed.
